

SEMPLICE BBQ ISLAND

For 31"- 33" Wide, Slide-In Grills

AVAILABLE COLORS:

Brownstone

Graystone

Charcoal Brown

INSTALLATION STEPS & COURSE DIAGRAM:

1. FOUNDATION

If you have a patio slab, preferably 4" thick, this would be a suitable foundation. The complete BBQ kit, with grill installed, is approximately 4200lbs. Choose an area that is mostly level, remember there is no mortar to adjust block. The Semplice BBQ Island Kit has access for a standard propane tank to fit inside or you may choose to run a natural gas line.

PREPARING A BASE LEVELING PAD: Excavate the base trench to 76" long x 40" wide. The trench should be approx 7" deep. Remove all the soil and fill the area with 3/4" rock, 6" deep (Approx 10cuft). Level the rock base approx 1" below final grade.

2. SPECIAL GROOVED UNITS

Set aside the two Special Grooved Pieces (16" & 8") and save for installation on Course#9

3. INSTALLING FIRST COURSE:

Make sure each unit is level side to side and front to back. Leveling the first course is critical for accurate and acceptable results. NOTE: Finished BBQ size will vary but is approximately 72"x36". Install units as close to each other as possible.

4. STACKING THE BLOCK:

Continue to stack courses as shown in the diagram. It is not necessary, but if you wish, you can secure block units using masonry adhesive (adhesive not included in kit). Small adjustments may be made using a rubber mallet.

5. INSTALLING COURSES 3-8:

Course#3 call for a special cut unit (14"x8"x1.5") at the base of BBQ door opening. While stacking Courses#3 - 8, be sure and check spacing for the 20"x14" BBQ door at each course.

Course# 10

INSTALLING FLAGSTONE TOP:

Set the 12"x33" flagstone (chiseled side out) on the back side of the BBQ first. Then set the (2) 23"x41" pieces on either side of the BBQ (cut side in, chiseled side out). Adjust stone to receive the BBQ unit. NOTE: Flagstone pieces and BBQ are heavy. 2 people may be required to install. RCP also recommends sealing the flagstone top with a Stone Sealer or Impregnator.

INSTALLING DOOR AND BBQ:

Install 20"x14" BBQ Door into opening on right side of BBQ Island. Install Slide-In Grill (Sold Separately). NOTE: RCP Block & Brick recommends hiring a NFI Certified Technician when making any natural gas or propane connections.
